Balance Adjustment

The center of gravity of the camera should be centered precisely over the axis of fluid head. Please kindly understand that unbalanced payload may damage the camera.

- ◆ Please make sure that camera and all accessories are installed before this operation.
- ◆ Please always maintain a firm hold on the camera until balance is achieved.

Balance setting

- 1: Adjust the counterbalance to about middle step, such as "7".
- 2: Please lock the tilt locking knob, dis the tilt drag to "0"

Centre

3: Please hold the camera or pan handle securely in level, then release the tilt locking knob, then observe how the camera moves.

a: If the camera stops in horizon, the balance is achieved.

b: If the camera falls forward (lens points downwards), please carefully slide the quick release plate in backwards.

c: If the camera falls backward (lens points upwards), please carefully slide the quick release plate in forwards. (PS: if necessary, please adjust the camera location on the plate).

★ Please repeat the operation until the camera could stay in horizontal position. Then lock the plate locking knob and tilt knob tightly.

Counterbalance Setting

The counterbalance system was designed to neutralise the effect of the camera weight when it is tilted. If the correct counterbalance is achieved, the camera should remain in any tilt position, and it could be moved by minimum effort in tilt.

The camera balance must be set before adjusting the counterbalance.

***Please make sure that camera and all accessories are installed before this operation.**

1-1: Hold the camera by securing the pan bar. Turn the counterbalance knob to the number which best compensates for the weights of the camera.

1-2: Releasing the tilt locking knob, tilt the camera upwards or downwards to 45° and release it, pls check if the camera will remain in a fixed tilt position.

a: If moving upwards, please lower the counterbalance. (Anticlockwise)

b: If moving downwards, please add the counterbalance. (Clockwise)

Setting of the Damping

1-1: Tilt drag:
Grades of tilt drag:0-7 steps.
Please dial the tilt drag knob to
your desired level.

1-2: Pan drag:
